

NUMERIC PAGER

Greater Versatility

With up to 20 digits available per message, codes can be as sophisticated as you like, and you can store up to 16 messages for future reference.

Cost Effective

The price you pay for being in touch is very small. You simply pay a fixed monthly rental which includes the service no matter how many messages you receive.

Faster Communication

You can rely on your message coming through in seconds because PageOne uses advanced satellite technology to send the message to transmitter sites across the country and through to you.

Easy To Use

To send a message to you, callers simply dial your pager number and then tap out the numeric message on any tone phone keypad. Alternatively, they can call the 24-hour PageOne Call Centre and leave their message with one of our operators.

Unsurpassed Back-Up

You need never worry about things going wrong. PageOne make a point of service. In fact, we provide a highly experienced Customer Services Centre for all service enquiries – whether you need a replacement, repair or simply want to know how the system works or how far it reaches – just call our Customer Services department on 0844 811 0070.
