

PHONE PAGER

Ultimate Flexibility

A loud clear tone lets you know that you are being paged even in a noisy street. For ultimate discretion you can set the pager to silently vibrate when you receive a message.

Greater Versatility

You can tell what kind of response is needed because this pager has up to 4 optional alerts.

Cost Effective

The price to pay for being in touch is very small. You simply pay a fixed monthly rental which includes the service no matter how many alerts you receive, or you can choose to buy the pager and pay separately for the service.

Faster Communication

You can rely on your message coming through in seconds because PageOne uses advanced satellite technology to send the alert to transmitter sites across the country and through to you.

Easy To Use

To reach you, callers simply dial a standard code followed by your pager number.

Unsurpassed Back-Up

You need never worry about things going wrong. PageOne make a point of service. In fact, we provide a highly experienced Customer Services Centre for all service enquiries – whether you need a replacement, repair or simply want to know how the system works or how far it reaches – just call our Customer Services department on 0844 811 0070.

Almost as small as it is light, the PageOne Tone pager can make a big difference at very little cost. With the PageOne Tone pager in your pocket you need never miss out on that important business opportunity again.
