

Powerful, secure, resilient mobile messaging

Connect delivers fast, secure access to UK and international GSM networks, offering 2-way SMS messaging to any combination of mobile phones, Blackberries, pagers and email. All at the click of a button, from the convenience of your desktop.

Whatever the size of your organisation, Connect provides a scalable messaging solution that's straightforward to use, is network independent and requires no new hardware or software. Simply access Connect from any Internet enabled PC, and you'll find that its feature-rich, intuitive, point and click interface will have you sending messages in minutes.

Features:

- Advanced messaging options
- Messaging to individuals and groups.
- Secure online address book
- Real time proof of delivery
- History Log
- SSL encryption
- Message templates

Simple and effective

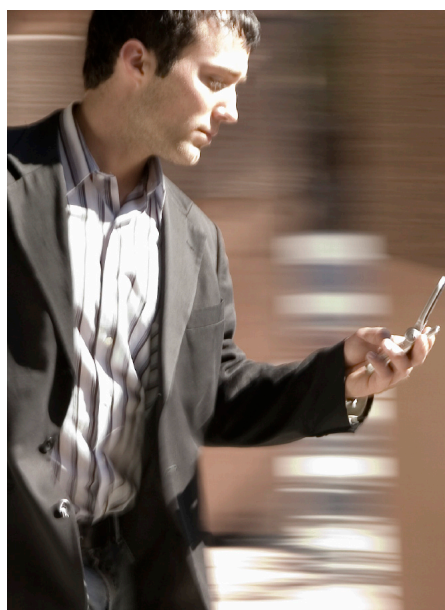

Connect provides users with a simple yet intuitive way to send messages, and can be accessed from any Internet enabled PC.

Smart Groups

PageOne Smart Groups are a powerful and flexible means of delivering high-volume broadcast information to multiple devices independent of network. Each Smart Group is assigned its own unique alert number with a user defined distribution list.

Inbound response number

Enhance your messaging services and applications with

2-way SMS, giving recipients the ability to reply and engage in real time 2-way interactive communications.

Enhanced Message Templates

Connect offers users the ability to include time, date and free text input fields into their predefined messages templates.

New Messaging Options

Send Flash SMS, WAP Push, vCard and vCal messages to individuals and groups.

Extended Sent History

Create reports for messages sent over the last 90 days or a count of outbound messaging for the same period.

Improved delivery reporting

Connect incorporates a 'traffic light' system that displays the current messaging delivery status 'at a glance'.
