

Send text messages from Microsoft Excel

What is the PageOne Microsoft Excel Plug-in?

PageOne's Excel plug-in allows you to conveniently send and receive SMS direct from Microsoft Excel.

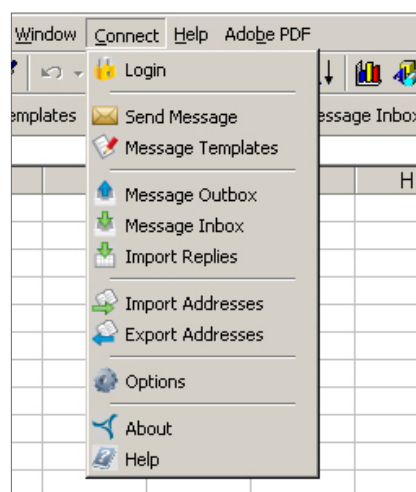

Benefits:

- Messaging direct from your desktop. Send SMS text messages from the familiar environment of Microsoft Excel.
- Easy to implement. Integrates seamlessly into your software allowing you to make use of your existing Excel databases.
- Works with your existing software. Empower your organisation with SMS functionality with minimal expenditure.
- Premium grade of service. Like all products in the PageOne range, our software plug-in processes inbound and outbound messages the instant they are sent.
- Personalised communications. Sophisticated 'merge field' capability enables you to make your message broadcasts relevant to your recipients.

- Optimising administration. Sending SMS straight from spreadsheet data helps reduce the time and cost involved in performing repetitive manual tasks.

Features:

- Simple and advanced sending options allow you to perform a 'Quick Send' as well as sending 'Templated' and 'Multiple' messages
- Definable message templates allow personalisation of mass message broadcasts
- In-product wizards guide you step by step through core functions such as sending messages and importing SMS replies
- Real time message delivery reporting

2-way SMS option How can I use my Microsoft Excel Plug-in?

Appointment and event reminders – Remind customer and staff of up and coming events such as appointments, interviews and service inspections.

Confirmation messages – Use the merge field capability in the message template function to personalise confirmation and reminder messages. Help reinforce a letter with a confirmation SMS e.g. "Dear Mr Smith, a letter with further details has been posted to you, if you do not receive this letter after 5 working days please call us on 020 8914 5141.

Promotional alerts – Keep customers and prospects up to date on your company's latest products and offers.
