

## The only SMS service approved by Jisc

### Overview

Janet txt is a comprehensive suite of secure SMS messaging services provided by PageOne on behalf of Jisc and is designed specifically to meet the requirements of the UK Education Community. Janet txt offers an array of easy to use desktop messaging products in addition to a full range of secure integration API's.

With special preferential rates, the Janet txt service allows users to take advantage of a resilient and affordable SMS messaging solution officially approved by Jisc.

### Safe and Secure

Data security is at the heart of Janet txt. PageOne uses only UK based Tier 3 data-centres, all web-service transactions are TLS encrypted. PageOne services are formally accredited to ISO27001 and are GDPR compliant.

### Benefits

- > Free to set up - With no set up fees or monthly charges for the basic service Janet txt offers a scaleable cost effective messaging solution. Our transparent pricing means that you know exactly what you are paying for.
- > High quality, low cost - With preferential rates, the Janet txt service allows users to take advantage of a resilient, high quality and affordable messaging solution whatever the size of your organisation.
- > Safe and secure - Users are provided with their own personal login and password, SSL encrypted access, and frequent security audits means peace of mind when sending your messages.
- > Full telephone and email support - Janet txt users have access to an extensive library of user guides and product documentation. Have a question? Our dedicated support team is only a phone call away.

### Features

- > Simple, fast, convenient - Janet txt accounts are intuitive to use and can be accessed from any Internet enabled device.
- > Messaging to individuals and groups - Send individual and group broadcast messages to mobiles, landlines, email and pagers.
- > Multi-lingual and international delivery capability - Send international language messages to GSM destinations around the world.
- > Real time delivery confirmation - Instant confirmation of message delivery and status.
- > 2-way SMS capability - Add 2-way functionality to encourage interaction with students, staff and parents.

## Messaging Suite

<b>Diary/Scheduler</b>	Scheduler allows users to set-up text message alerts in advance and regular events can be set to repeat on a daily, weekly, monthly or even yearly basis, stipulating a time and date for a message to be delivered.
<b>Templated Messaging</b>	Templated messaging allows users to streamline processes by creating and storing frequently used messages for future use. Messages can be predefined with the ability to include date, time, and freetext input fields.
<b>SmartGroups</b>	SmartGroups provide a powerful and flexible means of contacting large groups of recipients simultaneously. They may include a combination of devices and are perfect for emergency broadcasts and operational notifications.
<b>Reporting</b>	Users can create reports or filters for recent messages sent and received together with delivery status. Reports can be exported to MS Excel for further analysis.
<b>2-way Virtual Mobile Number</b>	Adding a dedicated 2-way inbound number to a Janet txt account allows recipients to respond to a message, creating a powerful and immediate channel to engage in a two-way interactive dialogue.
<b>MS Excel and Outlook add-ins</b>	The MS Excel add-in allows users to send and receive SMS messages directly from within Excel and merge data from lists to create personalised messages. An Outlook add-in allows you to send SMS direct from your Outlook email client.
<b>Opt-out notification service</b>	To help manage your contact data and comply with industry guidelines the opt-out notification service automatically alerts to a designated email address should a stop or opt-out message be received.
<b>Campaign Manager (Short Code and Keywords)</b>	Campaign Manager Services offer a user-friendly set of tools to encourage 2-way communications with their student base. Combined with SMS Short Code numbers and keywords, Campaign Manger offers a fast and immediate means for students to make simple enquiries, register for services, request specific information, or simply provide valuable feedback.
<b>Alpha Tag</b>	Alpha tags allows users to attach an organisation's name to an outbound message, ensuring recipients know exactly whom the message is from.
<b>Integration</b>	From Moodle to Tribal, Symphony and a range of other systems Janet txt offers direct integration with third party software via a range of API protocols including SOAP/XML , REST, SMPP, SNPP , SFTP and SMTP.
<b>Self Provisioning Tool</b>	The Self Provisioning Tool allows users to manage their own accounts by creating and deactivating accounts, constructing new broadcast groups, modifying a username or password and checking their message usage.
